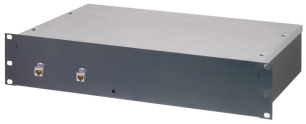
LHX+ Control Unit

Data Solutions



The Control Unit enriches the LHX+. It connects to the LHX+ sensors and the motorized coolant valve 23130-607. This enables the cooler to control the coolant air flow based on a chilled (supply) air temperature setpoint. It provides advanced remote monitoring functionality and various setup features.

FEATURES

- Coolant flow control based on chilled (supply) air temperature setpoint. More control features with water control package
- Separate, compact 19" control unit without loose wires in upper cabinet section
- Clearly marked plug & play sensor connections
